Larry's one-page guide

FIND A FILE • SAVE IT • SEND IT

1 Choose a language

Open the site link or START-HERE.html on the card. Tap your language.

2 Find something

Tap Library. Use Search or a category. Tap a title to open it.

3 Save it

Tap Save to my phone. Choose the smaller SD file when offered. Tap Save to Downloads.

4 Connect two phones

Both phones open the same site. Tap Send. One taps Send; the other taps Receive and types the six-digit code.

5 Finish the transfer

The sender chooses a file. The receiver checks its name and taps Accept, then Save.

Always check the copy

Open the file from Downloads on the receiving phone.

The website needs internet to stream and pair phones. A prepared card can hold files for offline use.
